

Online appointments and patient portal — for your practice.

Your practice calendar, bookable online — as a widget on your website or in the patient portal under your own domain. Online appointments from CHF 80 per physician and month. Your patients have an account with your practice, not with a general platform.

YOUR PRACTICE CALENDAR, ONLINE

docfox appointment booking sits directly on top of your existing practice calendar — connected via Axenita or a FHIR interface (e.g. Elexis). Patients book online, the appointment appears in your calendar. No parallel system, no duplicate maintenance, no new workflow for your practice team.

- ✓ **Your brand, your domain** — the portal runs under portal.yourpractice.ch, with your logo. Patient data stays with your practice, not in an account with a general platform.
- ✓ **Fixed price** — CHF 80.– per physician and month. Setup, SMS reminders and updates included.
- ✓ **Separate encryption per practice** — appointment data encrypted, keys held in an HSM, data stored in Switzerland, designed around medical professional secrecy (Art. 321 SCC).
- ✓ **More than appointments** — medication orders, documents and findings, patient onboarding and waiting lists in the same portal.

And everything you already have today:

- ✓ **No change for your practice assistants** — rescheduling, cancellations and appointment types as usual in your calendar.
- ✓ **Bookable where your patients are** — widget on your website, patient portal, web and app for iOS and Android.
- ✓ **Recurring and bundled appointments, video consultations, AI phone** — including multi-step workflows across lab, consultation and follow-up.
- ✓ **Switch included** — when switching from your previous appointment system we migrate your existing appointments via the Axenita interface, without interruption. Around two weeks with support, setup included in the annual contract.

Online appointments from CHF 80 per physician and month — switch included

FLEXIBLE APPOINTMENT TYPES

Blood sample
Lab · 15 min · arrive fasting

Results discussion
Consultation · 15 min

Follow-up
optional · book later

Bundled appointments — multi-step workflow

One treatment pathway across several calendars and resources. Example: blood sample in the lab, results discussion during consultation, optional follow-up. Prepared by the practice team and sent to the patient for booking.

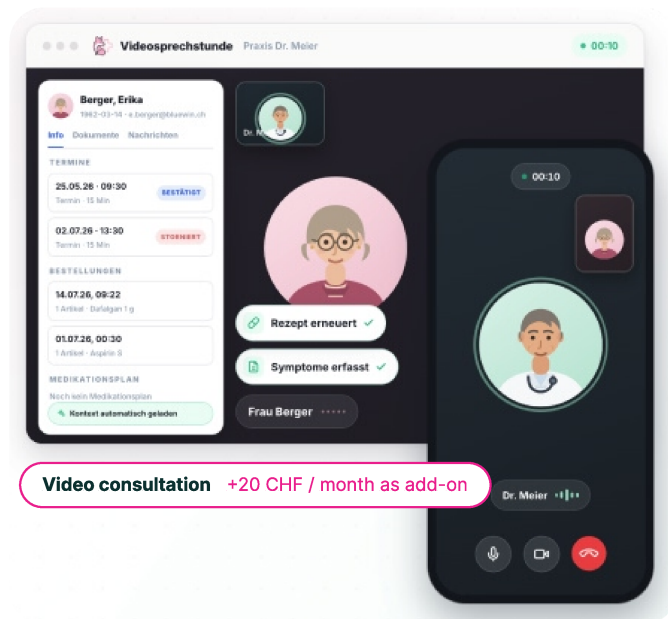

EXAMPLE: ALLERGY IMMUNOTHERAPY

Recurring appointments — repeat treatments

Repeat treatments as one connected booking. Example allergy immunotherapy: at least 6, at most 10 appointments. The patient sees the whole series and chooses every appointment themselves — nothing is scheduled for them in the background.

APPOINTMENTS FOR VIDEO CALLS TOO

What online appointments cost

Example: practice with 1 physician

	Competitor annual	docfox annual
Per month	133.35	80.–
Per year	1'600.–	960.–
Savings with docfox	40 %	—

All amounts in CHF

Competitor: base module for online appointment booking for general practitioners, 133.35/mth on the annual plan. docfox: 80.–/mth per physician, minimum term 1 year, cancellable monthly thereafter. Video consultation as an add-on module in each case: docfox +20.–/mth, competitor 25.–/mth (20.85 on the annual plan). Source: competitor's public pricing page, accessed 15.08.2026.

SECURITY, DATA PROTECTION, REMINDERS AND MORE

topDoc Visibility

topdoc.ch lists Swiss practices independently of the booking system — your practice appears at the top and marked, with a direct link to your appointment booking.

Swiss data hosting

Appointment data stored encrypted, keys held in an HSM. Compliant with the revised Swiss FADP, designed around medical professional secrecy (Art. 321 SCC).

Reminders: email and SMS

Appointment reminders by email or SMS — fewer no-shows, fewer queries.

An account with your practice

Patients register with you, not on a platform. One login for appointments, medication and documents.

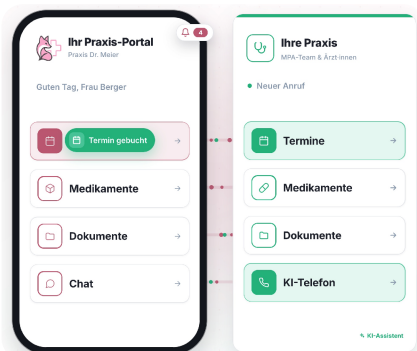

Four languages

Portal, calendar and AI in German, French, Italian and English — automatically in the patient's language.

Vaccinations and lab too

Not just consultations: vaccination appointments, lab appointments and other complex appointment types can be booked.

THE DOCFOX PORTAL — WWW.DOCFOX.CH

docfox offers far more than appointments. The docfox portal is your practice's digital front door — under your brand, with one login, as a web presence and as an app for iOS and Android. Your patients have all relevant data at a glance:

- **Onboarding and waiting lists** — new patients submit all onboarding information digitally
- **Medication** — scanning and ordering of medication, repeat orders, medication plan for patients
- **Documents & findings** — reports, lab values and photos stored securely
- **Messages** — encrypted contact with the practice team
- **Feedback and reviews** — patient feedback and Google reviews under control
